

NeuroPathway AI Gateway Prompt Library

NeuroPathway AI Gateway Prompt Library

A practical collection of prompts designed to help NeuroPathway turn everyday observations into structured evidence for early identification, SEND support, and EHCP development.

1. Observation-to-Pattern Analysis

Analyse observations and identify recurring patterns related to attention, emotional regulation, communication, sensory processing, executive functioning, social interaction, and learning.

2. SEND Category Mapping

Map evidence to Communication and Interaction, Cognition and Learning, Social, Emotional and Mental Health, and Sensory and/or Physical Needs.

3. Strengths-Based Summary

Create a balanced summary of strengths, interests, protective factors, and areas of difficulty.

4. Functional Impact Summary

Explain how needs affect learning, friendships, emotional regulation, independence, safety, and family life.

5. Evidence Gap Analysis

Identify missing assessments, reports, or observations that would strengthen understanding.

6. SMART Outcomes Generator

Create measurable outcomes for communication, emotional regulation, independence, academic progress, and social interaction.

7. Section F Provision Generator

Recommend specific and quantified educational provision, including frequency, duration, and staffing.

8. Annual Review Analysis

Compare current progress with previous outcomes and recommend amendments.

9. Parent View Generator (Section A)

Convert family notes into a clear and compassionate summary of strengths, concerns, and aspirations.

10. Teacher Summary Generator

Transform classroom observations into professional wording suitable for EHCP evidence.

11. Risk and Safety Analysis

Identify concerns related to self-harm, absconding, unsafe behaviour, or vulnerability.

12. Multi-Agency Summary

Combine information from home, school, health, and social care into one integrated summary.

13. Referral Recommendation Engine

Suggest relevant services such as Speech and Language Therapy, Occupational Therapy, CAMHS, or Educational Psychology.

14. EHCP Decision Support

Assess whether provision beyond ordinarily available school resources may be required.

15. Early Identification Screening

Highlight emerging needs and suggest practical strategies to try early.

16. Meeting Preparation Prompt

Generate key questions for school meetings, annual reviews, or professional consultations.

17. Professional Report Summariser

Summarise key findings, functional impact, and recommended provision from reports.

18. Child-Friendly Explanation

Explain strengths and support needs in reassuring, age-appropriate language.

19. Timeline Builder

Create a chronological timeline of concerns, interventions, and outcomes.

20. Real-World Evidence Generator

Produce anonymised metrics showing common patterns, referrals, and outcomes.

Master Prompt

Combine all available information to generate a full pattern analysis, SEND mapping, EHCP draft, outcomes, provision, and recommendations.

Core NeuroPathway Principles

- Needs first, not diagnosis
- Patterns, not labels
- Prevention Is the Cure
- Small Steps Create Big Change
